## PROFESSIONAL SUMMARY

Information Systems Engineering undergraduate (2nd Year) at SLIIT with a unique blend of technical and management skills. Experienced in bridging the gap between user needs and technical solutions through System Analysis and Design. Skilled in Java, MERN Stack, and Project Management, with a strong focus on building efficient, business-oriented software applications.

## TECHNICAL SKILLS

- Languages & Frameworks: Java, MERN Stack (MongoDB, Express, React, Node.js), PHP, HTML/CSS
- ISE & Management: System Analysis & Design (UML), Business Process Modeling, Agile/Scrum, Requirement Engineering, Multi-Factor Authentication (MFA), Secure Payment Gateways
- Tools: Jira, Git/GitHub, Arduino IDE, MS Visio / Draw.io (for diagrams) /Postman (for API Testing), Multer
- Database Management: MySQL, MongoDB.
- Operating Systems & Environments: Linux (Ubuntu), Windows Subsystem for Linux (WSL), VirtualBox.
- E-commerce & CMS: Shopify.

## PROJECTS (Academic & Personal)

### 1. Property Sales Management System | Technologies: Java, Gradle, REST API, MySQL

- Developed a robust backend API service for a property sales management system to streamline real estate operations.
- Designed comprehensive UML diagrams and ER diagrams to map out the system architecture before development.
- Implemented core functionalities including secure user management and comprehensive property data handling.
- Designed RESTful endpoints to ensure seamless integration with the frontend application.
-  GitHub - GayanGC/property-sales-backend: Backend API service for the Property Sales Manag...

### 2. User Login & Profile Management System | Technologies: PHP, MySQL, HTML/CSS

- Developed a secure and modern user authentication system allowing users to register, log in, and manage profiles.
- Implemented robust security measures, including password hashing, to ensure data protection and secure access.
- Designed features for profile customization, enabling users to update personal details and upload profile images efficiently.
-  GitHub - GayanGC/php-login-system: A secure and modern User Login and Profile Managemen...

### 3. Bakery Management System (Sweet Delights) | Technologies: MERN Stack (MongoDB, Express, React, Node.js), JWT, Multer

- Developed a comprehensive Enterprise Resource Planning (ERP) solution for a bakery, featuring multi-role access for Admins, Managers, Staff, and Customers.
- Architected a Two-Tier Administrative Approval Workflow where new staff accounts are manually vetted and assigned a secure 4-digit PIN for Multi-Factor Authentication (MFA).
- Integrated an Omni-Channel Cart System with a virtual payment gateway, featuring real-time Regex validation for credit card details and a simulated processing interface.
- Implemented a Relational Delivery Tracking Module allowing administrators to dynamically assign orders to active staff members with real-time status updates.
- Designed an Advanced Analytics Dashboard to visualize revenue splits between Online and Cash on Delivery (COD) transactions using data visualization tools.
- Engineered a Fault-Tolerant Profile Management system using Multer middleware for secure binary image uploads and automated folder synchronization.
- Served as the **Project Leader** for a team of 7 members, overseeing the full Software Development Life Cycle (SDLC).
- Managed tasks and sprint planning using **Jira**, implementing **Agile/Scrum** methodologies to ensure timely delivery.
-  GitHub - GayanGC/bakery-app-ise: A comprehensive Bakery Management System (Mobile & W...

### 4. Part Time – Student Gig Marketplace & Attendance System *Full-Stack Developer* | React, React Native, Firebase

- Platform Overview: Developed a dual-platform solution (Web & Mobile) to connect university students with short-term job opportunities while streamlining manpower management for employers.
- Web Dashboard (Employers): Built a professional dashboard for job posters to create listings, manage applicants, and track hiring stats using React and Tailwind CSS.
- Mobile Application (Students): Engineered a cross-platform mobile app using Expo (React Native) featuring real-time job feeds, university-based filtering, and application tracking.
- QR Attendance System: Integrated a secure QR-based attendance flow where unique tokens are generated upon job approval and verified via a built-in camera scanner to automate work-hour tracking.
- Backend & Security: Implemented Firebase Authentication for secure role-based access and Cloud Firestore for real-time synchronization between web and mobile interfaces.
-  GitHub - GayanGC/part-time-platform: A full-stack marketplace platform connecting Universit...

## EDUCATION

- BSc (Hons) in Information Technology - Specializing in Information Systems Engineering (Reading) (2nd Year, 2nd Semester)
- Certified Level 01 AAT Sri Lanka
- G.C.E. Advanced Level Examination (2023/2024) Passed with 3 Cs (ICT, Economics, Accounting)
- G.C.E. Ordinary Level Examination (2020) Passed with 3 As and 6 Bs (including Mathematics, Science, and English).
- Diploma in Psychology and Counselling (Reading) - IMBS Campus
